

VARUN SONI

Responsible and motivated student, with a passion for web development who enjoys creating visually appealing and user-friendly web interfaces. Offers excellent technical abilities with software and applications, ability to handle challenging work, and excellent time management skill. Let's connect and explore potential collaborations and projects together!

PROJECTS

TODO List

A dynamic and responsive web application, created for managing to-do lists. The app supports task/to-do creation, marking them as completed, editing, and deletion. All changes are saved in Google's Firebase Realtime Database and authentication, and the app is styled with Tailwind CSS.

KnowYourWeather

A simple web application built using Next.js and RapidAPI to provide users with up-to-date weather information for locations around the world.
